CODESCHOOL · AFTER THE INTERVIEWS

Decision Kit

Turn 15-20 school interviews into a decision: the findings memo, the go/no-go check, and the pilot offer and letter of intent if the answer is go.

Companion to the CodeSchool Research Pack and Interview Field Kit

Use: 14-18 December 2026 (memo and decision); January 2027 (pilot offers)

Templates: review before sending; not legal advice

Save filled copies outside the public repository

How to use this kit

Work through it in order once interviews finish. Parts 1-2 are always used; parts 3-5 only if the decision is go.

Part	When	What it produces
1. Findings memo	14-16 Dec	The 2-page memo the interview plan calls for
2. Go / no-go check	17-18 Dec	A decision against the pre-agreed rule
3. Pilot success criteria	Before any offer	What a pilot must show, agreed in advance
4. Pilot offer letter	Jan 2027, if go	A one-page offer to 2-3 schools
5. Letter of intent	With the offer	A non-binding signal of purchase intent before book lists close

The rule you are testing

Decision rule (set before interviews): go ahead with a December pilot offer if **H1, H2 and H3 are supported in at least half of the CBSE schools**, **H4 holds in the mid and premium tiers**, and **H11 (the booklist route) holds in at least half of mid- and premium-tier schools** (H11 added 6 Nov 2026). If H1 fails, the product shouldn't depend on the CBSE circular: revisit the parent channel and the ICSE and state-board angles.

Parts 4 and 5 are **draft templates**. Get them reviewed before sending, especially the privacy wording, because a pilot may involve student work. Keep filled copies out of the public repository.

Contents

How to use this kit 2

1. Findings memo 4

1.2 What we learned (top five) . . . 4

1.3 Hypothesis results . . . 5

1.4 The two newest risks . . . 5

1.5 Devices across schools . . . 6

1.6 What changes in the product plan . . . 6

2. Go / no-go check 7

If H1 failed: plan B . . . 7

Next steps . . . 7

3. Pilot success criteria 8

4. Pilot offer letter (template) 9

5. Letter of intent (non-binding template) 10

1. Findings memo

Two pages maximum when exported. Fill each box with evidence: counts, quotes and roles, not opinions.

Date		Author	Anoop Dobhal	Schools		Interviews	

1.1 Sample achieved

	Planned	Achieved	Note
CBSE schools	about 12		
ICSE schools	4-5		
State board schools	1-2		
Budget tier	about a third		
Mid tier	about a third		
Premium tier	about a third		
States covered	3+		
Hindi / regional-medium schools	4+		
Class 3-5 teachers (B3 walkthrough)	1 per school		
Device audits	1 per school with a computer teacher		

1.2 What we learned (top five)

Finding 1

Finding (one sentence)

Evidence: n of N schools, quotes with roles

Finding 2

Finding (one sentence)

Evidence: n of N schools, quotes with roles

Finding 3

Finding (one sentence)

Evidence: n of N schools, quotes with roles

Finding 4

Finding (one sentence)

Evidence: n of N schools, quotes with roles

Finding 5

Finding (one sentence)	
Evidence: n of N schools, quotes with roles	

1.3 Hypothesis results

#	Hypothesis	For	Against	Unclear	Verdict	What changes in the plan
H1	CBSE schools are implementing CT&AI in 2026-27				Too early	
H2	Schools struggle to deliver it with current teachers				Too early	
H3	Principals will pay alongside the free books				Too early	
H4	A Rs 300-600 package is acceptable				Too early	
H5	Unplugged-first fits real equipment				Too early	
H6	A maths teacher can run a level in one period				Too early	
H7	Assessment and reporting are a reason to buy				Too early	
H8	ICSE schools have a similar need				Too early	
H9	Schools want a Scratch-to-Python route				Too early	
H10	Schools struggle with what CBSE didn't provide				Too early	
H11	Schools will put a workbook + app on the booklist				Too early	
H12	Schools will replace the current Computers book				Too early	
H13	Student-data handling matters to buyers				Too early	

1.4 The two newest risks

Both came from CBSE's April 2026 webinar and were added to the coordinator guide (questions 8 and 9).

Question	Count / answer	What it means for the product
Coordinators planning to teach coding anyway, despite CBSE's "no coding/software" message		
Schools that have received CBSE's promised project list with rubrics		
Schools running the Class 8 Teachable Machine labs		

1.5 Devices across schools

Device summary	Schools
A: few/no devices, lessons on paper	
B: shared lab, weekly or less	
C: projector in most classrooms	
D: ~1 device per 2 students, weekly+	
E: near 1:1	

1.6 What changes in the product plan

Keep: What the evidence confirms	
Change: What needs a different design, price or audience	
Drop: What schools clearly don't want	
Add: Needs we didn't expect	

2. Go / no-go check

Apply the rule exactly as written before the interviews. Record the numbers, then the decision.

Condition	Supported in	Of CBSE schools	Met?
H1 Implementing CT&AI: supported in at least half of CBSE schools			-
H2 Struggling to deliver: supported in at least half of CBSE schools			-
H3 Will pay alongside free books: supported in at least half of CBSE schools			-
H4 holds in the **mid** tier (most ceilings at or above Rs 300)			-
H4 holds in the **premium** tier			-
H11 booklist route holds in at least half of **mid and premium** schools			-

Decision Not decided

Reasoning in three sentences

If H1 failed: plan B

Pursue?	Alternative	First step
☐	Parent channel (home practice tied to school syllabus)	Parent survey in 2-3 states
☐	ICSE schools (Computer Studies Classes 1-8)	Interview 5 more ICSE heads
☐	State boards with coding in textbooks (Kerala, Tamil Nadu)	Map KITE / TN SPARK content
☐	Pause and re-research	Revisit in the next buying cycle

☐		Anoop	

3. Pilot success criteria

Agree these with yourself before any offer, and share them with the school, so the pilot result can't be argued afterwards. Targets are suggestions; edit them.

Area	Measure	Target	Result
Teacher delivery	Planned pilot periods the teacher ran without outside help	80%	
Fit to the timetable	Lessons that fit one period	90%	
Learning	Students passing the level check after each level	70%	
Engagement	Students completing the "make" step	75%	
Teacher time	Prep time per lesson (minutes)	10 min or less	
Teacher view	Teacher would use it again next session (1-5)	4 or more	
Coordinator view	Assessment records usable for report cards	Yes	
Buyer signal	Principal signs a letter of intent or names a price	Yes	

Pilot classes and sections	
Pilot dates	January - March 2027 (or first term 2027-28)

4. Pilot offer letter (template)

Only if the decision is go. Fill the fields, review the text, then print or send as a PDF.

To (name, role)	
School	
Date	
Classes and sections in the pilot	e.g. Class 4 (2 sections) and Class 7 (1 section)
Pilot period	January - March 2027
Your phone / email	

Dear Sir / Madam,

Thank you for speaking with me about how your school is teaching Computational Thinking and AI. Based on what schools told us, I'd like to offer your school a **free pilot** of CodeSchool for the classes and period above.

What the pilot includes (tick what applies):

- ☐ Level-based CT and coding lessons mapped to the NCERT maths chapters your teachers already follow
- ☐ A teacher script, answer key and misconception notes for every lesson, runnable in one period
- ☐ A project kit for one Class 6-8 project (brief, rubric, examples, assessment)
- ☐ AI-chapter teacher slides and a classroom activity that works without a computer lab
- ☐ A progress journal mapped to CBSE competencies, printable for report cards
- ☐ A one-hour orientation for participating teachers, and weekly check-ins

What we ask of the school: one named teacher per pilot section; the planned periods in the timetable; two short feedback conversations (mid-pilot and end); and the pre-agreed success measures shared with you in advance.

Cost: the pilot is free. There is no obligation to buy afterwards.

Children's privacy: we will not photograph or record students. Any student progress is recorded against roll numbers chosen by the school, kept privately, used only to report results to the school, and deleted at the end of the pilot unless the school asks to keep it.

After the pilot: we'll share the results against the agreed measures. If the school wishes to continue, we can discuss a licence for the next session before your book list closes. A non-binding letter of intent is attached for convenience.

Warm regards,
Anoop Dobhal
CodeSchool

5. Letter of intent (non-binding template)

Signals purchase intent before book lists close, without committing the school. Review the wording before use.

Letter of intent: CodeSchool, session 2027-28

School name and address	
Board	CBSE
Classes	
Approximate number of students	
Indicative price per student per year (Rs)	
Intended start	April 2027
Conditions	Satisfactory pilot against the agreed measures

The school named above intends, subject to the conditions stated, to adopt CodeSchool for the classes and approximate number of students listed, for the session shown, at around the indicative price.

This letter is not a contract and creates no legal obligation on either party. Final terms, price and scope will be agreed separately in writing.
