Using these assessments

This book has one assessment for every chapter of *Think Like a Coder*, Class 5. Each assessment fits on one page, takes about 30 minutes and is marked out of 10. Use it after the chapter's last period, or as a revision check later in the term. All questions are new: they test the same skills as the workbook, not the same questions.

Section	What it checks	Questions	Marks
A	Knowing and understanding the chapter's ideas	3 multiple choice	3 x 1
B	Applying the idea to a short problem, with working	2 short answers	2 x 2
C	Thinking like a coder: write, trace, fix or explain a program or plan	1 task	1 x 3

Turning a score into a journal level

Score	Journal level	What it usually means
9-10	Extending	Solves new problems and explains the reasoning
7-8	Secure	Applies the idea correctly on their own
4-6	Developing	Understands with prompts; makes some slips
0-3	Beginning	Needs more practice with the chapter's idea

✓ Good practice

- ✓ Read the questions aloud for children who find reading hard: we are testing thinking, not reading.
- ✓ Give full marks for any correct method, even if it differs from the answer key; the marking guides list what to look for.
- ✓ Give part marks in Sections B and C for correct working, even when the final answer has a slip.
- ✓ Record the score on the class record sheet, and use it with your observations in the journal, not instead of them.
- ✓ Go over the test with the class: the most common mistakes are a lesson plan for the next period.
